

## Great Basin Incident Commander Conference Call Agenda

**Date:** 9 Aug 19

**Note taker:** Richard Anderson

### Weather:

Great Basin  
Coordination Center

**\*\*\* High Risk for Lightning on Thursday \*\*\***

**\*\*\* High Risk for Wind on Friday and Saturday \*\*\***

Thunderstorms will become more widespread across the geographic area today with storms becoming wetter over Utah, much of NV and portions of the central Idaho mountains. **Storms may be on the drier side over northwest NV and southwest Idaho today.**

On Friday, the main concern shifts to the potential for elevated winds across eastern and southern Nevada and along the Sierra Front. An approaching cold front will bring dry air and elevated winds to the area beginning Friday and cooler weather this weekend. Thunderstorms may continue on Friday over parts of far northern Nevada into Idaho before the drier air moves in. Winds may increase further on Saturday across Nevada and Utah and into southern Idaho. **High Risk** has been issued for gusty winds/low RH especially in areas where there are ongoing fires and expected additional lightning.
